

Improving crop health & quality the natural way

All the way from South Africa! Dr. Riaan Lourens on the wonders of 'Kelpak' – a natural seaweed-based fertiliser that can be used to improve plant growth, yield & quality in field veg & potatoes, protected edibles, ornamentals, or indeed any crop!

PLUS

- Richard Cameron from Omex: Foliar nutrition - using liquid feeds to the best of advantage to improve crop health & performance.
- Nicola Dunn, Waste & Recycling expert from NFU Head Office: With increasing grower interest in the use of beneficial materials such as compost, digestate & paper wastes what are the rules & regulations governing the spreading of such material to farmland? AND an update on all you need to know about the Environment Agency's waste exemptions.

7:30pm on TUESDAY 31st JANUARY 2012

***Briars Hall Hotel, Briars Lane, Lathom, Nr Ormskirk, LANCS, L40 5TH
(Just off the A59 Ormskirk to Preston road)***
